ASIST

Download zipped BD files

> wget https://fastdl.mongodb.org/tools/db/mongodb-database-tools-debian11-x86_64-100.6.1.tgz

Extract contents

> tar -zxvf mongodb-database-tools-debian11-x86_64-100.6.1.tgz

Copy contents to the binary folder

> cp * /usr/bin/

Download DB

> mongodump --uri "mongodb://mongoadmin:5d57dcafba86f32d4172093e@vsgate-s1.dei.isep.ipp.pt:10337/admin" --out "/home/"

Install ZIP and UNZIP packages

> apt install zip unzip

ZIP folder

> zip -r backup.zip admin/

Download GDrive

> wget https://github.com/BugCode1/gdrive/releases/download/2.1.2/gdrive_2.1.2_linux_386.tar.gz

Extract contents

> tar -zvxf gdrive_2.1.2_linux_386.tar.gz

Copy contents to the binary folder

> cp gdrive /usr/bin/

Install mariadb-client

> apt install mariadb-client

Dump DB

```
mysqldump -u root -pciTaGnrTvpWc -h vs275.dei.isep.ipp.pt --all-databases >
/home/asist/gdrive/maria_daily/dump.sql
```
